

INTRODUCING tiwi™ for fleets **A NEW GENERATION OF RISK REDUCTION AND FLEET PRODUCTIVITY IS NOW HERE.**

- **Through inthinc's proprietary technology, drivers receive verbal, in-cab alerts the instant they exhibit a dangerous driving behavior, from speeding, to seat-belt violations, to unsafe braking, turning or acceleration.**
- **This real-time, in-cab mentoring is proven to reduce unsafe driving behaviors immediately and dramatically – with customer results demonstrating reductions greater than 80% in speeding violations and aggressive driving.**
- **Through tiwi's easy-to-use, web-based dashboard, management receives a full range of exception-based reports providing a clear picture of safety-related incidents by driver and by vehicle.**
- **Every incident is also captured and reported in real-time via cellular technology, enabling instant notification of accidents and other serious exceptions requiring immediate response.**

tiwi™ delivers the same patent-pending inthinc™ technology proven to dramatically change driver behavior and prevent crashes in a truly easy-to-implement, easy-to-manage system. The result is a complete safe-driving solution that delivers immediate and dramatic business results for fleets of all sizes.

THE INTHINC ADVANTAGE: FEATURES THAT CREATE IMMEDIATE RESULTS.

AUDIBLE IN-CAB DRIVER MENTORING/NOTIFICATIONS

- Based on driving behavior / driving style
- Hard turn, acceleration, brake, and bump alerts
- Seat belt violation alerts*
- Speeding violation alerts
 - based on actual speed compared to posted speed limit through inthinc's proprietary Speed-by-Street™ capability*
 - ability to set speed and device sensitivity

SMARTZONES™ GEO-FENCING

- Zone arrival and departure alerts
- No limits to amount of zones that can be established and monitored

LIVE FLEET/DISPATCH

- Easy-to-use fleet locating/mapping interface
 - locate vehicles via address search, GPS location and last communicated position

SPEED-BY-STREET™

- Compares actual vehicle speed to proprietary database of posted speed limits*

REAL-TIME INCIDENT NOTIFICATION

- Sent instantly via e-mail, text message or phone
- Emergency call button for driver
- Crash detection/Roll-over detection
- Alert notification in event of power loss

RFID CAPABILITY

- Allows data to be assigned to individual drivers of vehicle
- Mapping interface utilized for trips and event identification

*Some limitations apply

Innovative verbal, in-cab alerts provide real-time feedback to your drivers resulting in quick, dramatic behavior changes.

INTHINC INNOVATION: IMMEDIATE, EXCEPTION-BASED DATA AT YOUR FINGERTIPS.

COMPREHENSIVE FLEET MONITORING & REPORTING PORTAL

- Easy-to-use, web-based portal
- Hierarchy-based system with multi-level permissions/roles

REPORTS & TREND ANALYSIS

- Based on user permissions/roles
- Overall score dashboards (Fleet, Division & Team levels)
- Trendings charts that quickly pinpoint areas of improvement or special risks
- MPG reporting
- Driver/vehicle performance including seat belt, speeding and driving style
- Idling reporting
- Red flags, events, violations & warnings
- Trip or trips analysis
- Coaching events/corrective driving behavior tracking

DRIVER PERFORMANCE SCORING

- Based on a scale of 0.0 to 5.0
- Based on custom algorithms and computations

REPORTS SCHEDULING/DISTRIBUTION

- Schedule a report to be automatically created & sent
- Print, export and e-mail reports

REPORT ARCHIVE

- 12-month legacy data storage/repository

Real-time incident notification is sent via e-mail, text message or phone, enabling you to respond immediately to critical situations.

THE BUSINESS BREAKTHROUGH BACKED BY MILLIONS OF MILES OF R.O.I.

tiwi™ is a complete driver-safety solution that delivers immediate and dramatic results for fleets of all sizes.

In fact, the technology behind tiwi – compared to FMCSA averages – is estimated to have saved over 200 crashes, prevented 65 injuries and saved companies nearly \$19 million in damages over the 155 million documented customer miles in 2008 alone.

Contact your inthinc representative today and discover how tiwi can deliver a new generation of risk reduction and fleet productivity for your business.
